HOW TO USE
ALERT ACCESSORIES

The accessories use NFC functionality to provide critical or important information. Simply hover your phone over the accessory (e.g., tag or card), and a pop-up will display the information, depending on compatibility. Please see the instructions below for the different operating systems to assist individuals with the alert accessory. The download takes seconds, and you're all set to help!

Apple devices cannot scan the accessory to read information directly; therefore, an app download is required.

 Apple

iOS
Download the
App Now

**Step 1: Open App Store or click the icon on the left
Step 2: Search "Simply NFC"
Step 3: Open App, Select scan and
hover over the accessory to
read the information**

android

Android devices should be able to scan the accessory without using an app due to their capability differences. However, if you are unable to scan, ensure that your NFC setting is enabled.
